History

The year of 1989 began the water weaponry revolution. The origin of the Super Soaker® actually dates back to 1982 when Dr. Lonnie nuclear engineer, first had the idea of making a high performance toy water gun. At the time, he was employed at the Jet Propulsion Laboratory in Pasadena California as a spacecraft systems engineer on the Galileo mission to Jupiter. As a part time inventor, it took eight (8) years before the gun was finally introduced to consumers. It went on to become the worlds best brand of water gun history!
